## ABOUT ME

---

Software Developer specializing in **Full-Stack Development and AI/ML**. Experienced in building **scalable web applications, AI-integrated systems, and decentralized solutions** using React, Node.js, Python, SQL, and Linux. Skilled in **API development, system integration, and modern software engineering**.

## EDUCATION

---

### Adamas University

*Bachelor in Computer Application*

Barasat-Barrackpore Road, West Bengal

*Aug. 2023 – Jun 2027*

### Jawahar Navodaya Vidyalaya

*Secondary and Higher Secondary*

Gopalpur-Birbhum, West Bengal

*Jul. 2015 – Apr 2022*

## EXPERIENCE

---

### Euphoria GenX

Jun. 2025 – Jul. 2025

*MERN Stack Developer Intern*

- Completed a Skill Development and Industrial Internship Programme focused on **MERN Stack Development with AI Integration**.
- Developed **Lunaria E-Commerce**, a full-stack clothing marketplace integrating AI-powered Virtual Try-On functionality into the shopping workflow.
- Built application workflows using **React, Node.js, Express.js, and Python**, integrating AI services with the e-commerce platform.
- Reduced raw image bandwidth consumption by **50%** through Cloudinary optimization and maintained standard catalog API response times under **300ms**.

## PROJECTS

---

### Federated Learning Supply Chain Control Tower | *Python, PyTorch, FedAvg, Local LLMs*

2026

- Built a privacy-preserving supply chain forecasting system using Federated Learning to train models across multiple simulated nodes without sharing raw business data.
- Implemented FedAvg-based collaborative learning with PyTorch for decentralized demand forecasting and model aggregation.
- Integrated local LLM support to assist with supply chain insights and control tower-style decision workflows.

### Decentralized Voting System | *Blockchain, Web3.js, Node.js, Express.js*

2025

- Built a decentralized voting system (on Ethereum blockchain) that handled over 1,000 mock ballots with tamper-proof validation.
- Integrated smart contracts with Web3.js to handle voting logic and result validation.
- Built the frontend with HTML, CSS, JavaScript and connected it to blockchain backend using Express.js.

### AcademyWale — CA/CMA LMS & E-Learning Marketplace | *React, Node.js, Express.js, PostgreSQL*

2026

- Engineered a full-stack **CA/CMA e-learning marketplace** supporting course discovery, faculty profiles, video lectures, test series, study materials, cart, checkout, and personalized student workflows.
- Built a decoupled **React 19 + Express.js REST API architecture** with Supabase/PostgreSQL and an isolated admin workspace for course, faculty, institute, enrollment, transaction, coupon, and testimonial management.
- Integrated **Razorpay with webhook verification, UPI payments, JWT authentication, Cloudinary CDN, and automated email/OTP services** for secure payments, media delivery, authentication, and transactional communication.

### Music Player Application | *Python, tkinter, pygame, mutagen*

2024

- Created a desktop GUI music player supporting MP3/WAV formats, metadata display, and basic controls using Pygame and Mutagen.

## TECHNICAL SKILLS

---

**Languages:** Python, JavaScript, Java, Bash

**Databases:** PostgreSQL

**Tools:** Git, Docker, Linux, VS Code

**Web:** React, Node.js

**AI/ML:** PyTorch, Federated Learning, Local LLMs

**Other:** REST APIs, Web3.js, Debugging, Automation
